As a Medicaid Employee, I want to view a recipient's employment hours, employer information, and any other needed documentation in one place so that I can quickly verify whether the recipient meets the work requirement for Medicaid eligibility.

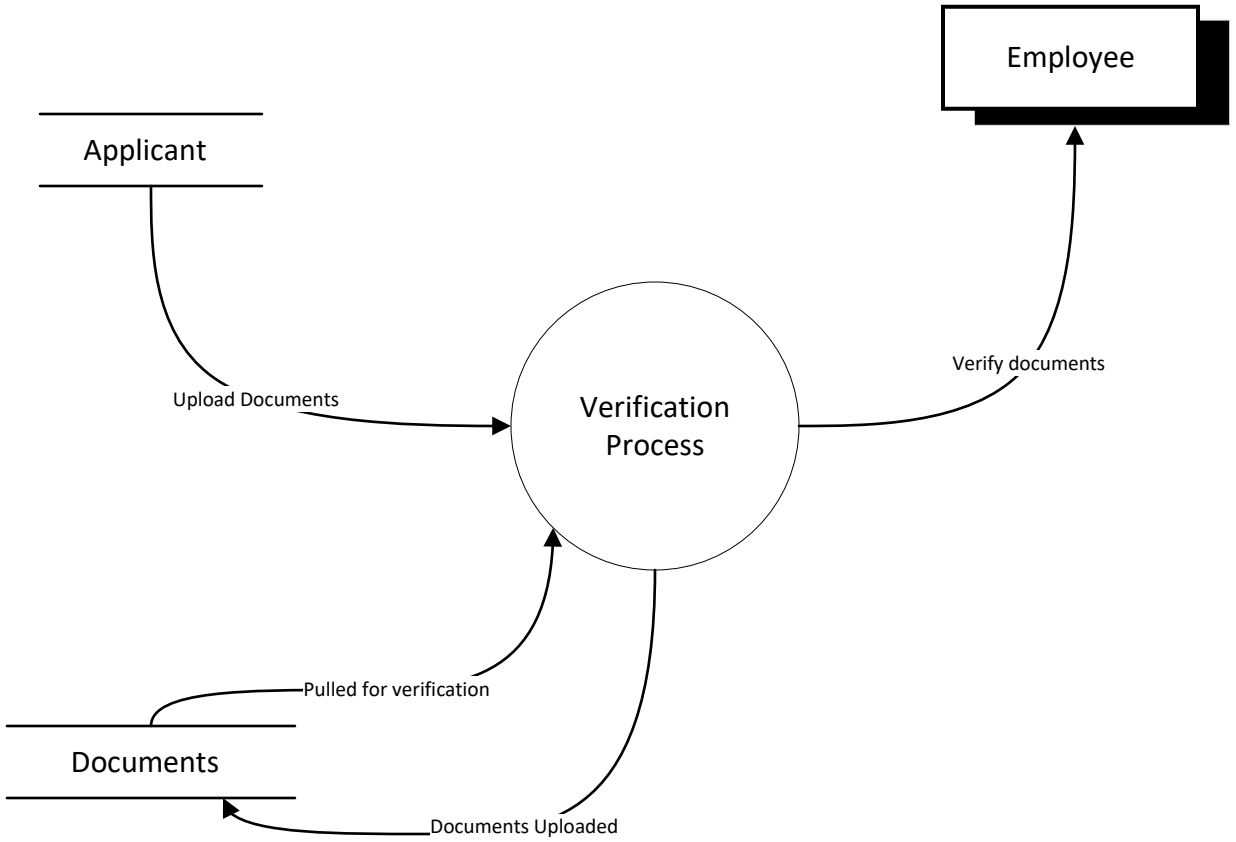

As a Medicaid applicant, I want to be able to update my employment information if my job or income changes so that my eligibility can be reviewed using accurate information.

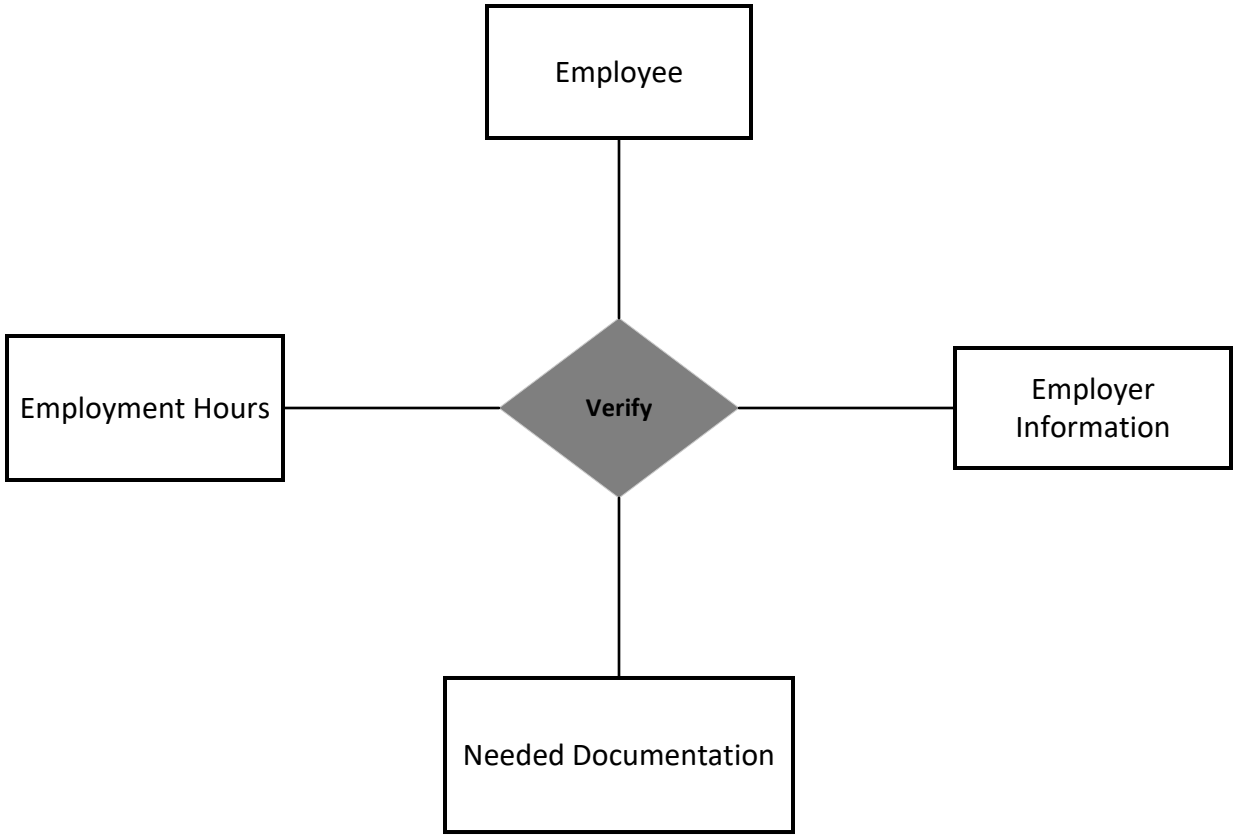

As someone who doesn't know much about Medicaid or the process to get approval, I want to learn more about the program so that I can get the proper coverage.

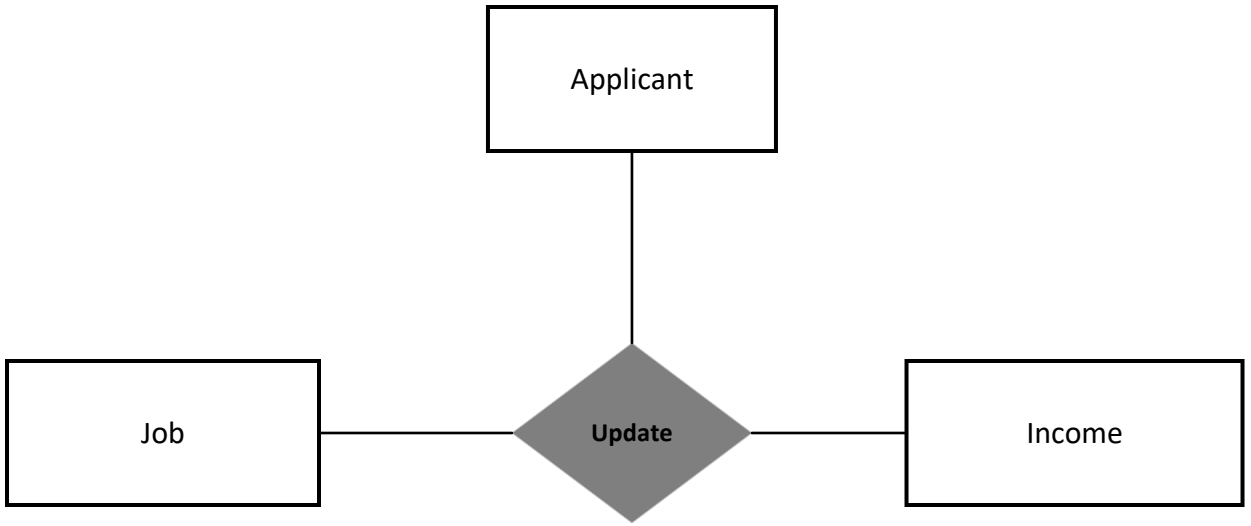

As a Medicaid employee, I want applicants to upload documents so that I can verify them against the qualification criteria.
